

Strategy Description

Passage Dividend Appreciation invests in the stocks of mid-to-large-cap U.S. and international companies with robust balance sheets, consistent earnings, attractive valuations, and stable dividend growth. These companies are evaluated based on the strength of their financials, management prowess, and cash-flow generating ability. The strategy generally has a U.S. large-cap value tilt although the total opportunity set also includes mid-cap stocks and is not restricted by geography.

Growth of \$10,000

Hypothetical growth of an investment in the strategy net of fees since inception based on a starting value of \$10,000.00.

10-Year	-	-	-
Since Inception 03/01/2018	9.14%	10.54%	10.32%

Disclaimer

All net returns and statistics for Passage Dividend Appreciation use a model annual fee rate of 1.25%. This is the highest fee rate offered to prospective investors in the strategy. Returns and statistics are based on monthly performance of a composite of all client accounts dedicated to the investment strategy. The composite excludes accounts with only a portion of assets invested in the strategy. There is no guarantee that the investment objective will be met. As with any investment, you could lose all or part of your investment in the portfolio, and the portfolio's performance could trail that of other investments. Past performance does not guarantee future results. All returns are presented based on U.S. dollars with dividends reinvested. Performance may differ for each individual. Passage Dividend Appreciation is subject to significant market risk due to 100% allocation to equities. Due to concentration, the portfolio is subject to idiosyncratic stock risk. The strategy invests in international companies which may be affected by local economies. Companies may not be able to maintain and grow dividends, especially in cases of economic stress, such as the covid-19 pandemic. In taxable accounts, the strategy will likely generate taxes on short-term and long-term capital gains as well as dividends. For more information about the data presented, please contact Passage Global Capital Management.
