

## Strategy Description

The Passage Index Plus strategy systematically invests in high-quality companies from the S&P 500 universe based on fundamental criteria with the aim of generating superior risk-adjusted returns. Risk filters are applied in the stock selection process for final portfolio construction.

## Growth of \$10,000

Hypothetical growth of an investment in the strategy net of fees since inception based on a starting value of \$10,000.00.

## Composite Characteristics

Composite Name	<b>PASSAGE Index Plus</b>
As of	<b>March 31st, 2024</b>

## Risk Metrics

	Since Inception 01/01/2020
Alpha	2.06
Beta	1.04
Downside Capture Ratio	103.31
Standard Deviation	21.42
Sharpe Ratio	0.68
R-squared	87.86
Max Drawdown	-23.84
Upside Capture Ratio	108.80

\*S&P 500 Idx TR USD is used to calculate risk statistics.

## Trailing Periods

All returns are TWR, Net of Fee. Returns greater than 12 months are Annualized.

## Annual Composite Review

Year	Net Return	Benchmark Return	3 Yr Standard Deviation	3 Yr Benchmark Std. Deviation	Dispersion
2024 (partial)	11.01%	10.56%	21.45%	17.60%	-
2023	29.09%	26.29%	21.39%	17.54%	0.42%
2022	-14.99%	-18.11%	21.55%	21.16%	-
2021	32.71%	28.71%	-	17.41%	0.67%
2020	18.54%	18.40%	-	18.79%	0.57%

The composite dispersion calculation only includes accounts that were part of the composite for the entire period.

The composite dispersion is measured by the Asset-weighted standard deviation of the returns for each portfolio in the composite.

## Net vs. Gross Performance

	Net of Fee	Gross of Fee	S&P 500 Idx TR USD
MTD	4.80%	5.13%	3.22%
3-Month	11.01%	11.36%	10.56%
YTD	11.01%	11.36%	10.56%
1-Year	28.98%	30.60%	29.88%
3-Year	13.70%	15.14%	11.49%
5-Year	-	-	-
10-Year	-	-	-
Since Inception 01/01/2020	16.54%	18.01%	13.96%

## Disclaimer

All net returns and statistics for Passage Index Plus use a model annual fee rate of 1.25%. This is the highest fee rate offered to prospective investors in the strategy. Returns and statistics are based on monthly performance of a composite of all client accounts dedicated to the investment strategy. The composite excludes accounts with only a portion of assets invested in the strategy. There is no guarantee that the investment objective will be met. As with any investment, you could lose all or part of your investment in the portfolio, and the portfolio's performance could trail that of other investments. Past performance does not guarantee future results. All returns are presented based on U.S. dollars with dividends reinvested. Performance may differ for each individual. Passage Index Plus is subject to significant market risk due to 100% allocation to equities. The model is based on purely quantitative measures which, despite having performed well in the past, may not perform well in the future. Due to concentration, the portfolio is subject to idiosyncratic stock risk. In taxable accounts, the strategy will likely generate taxes on short-term and long-term capital gains as well as taxes on dividends received.
